unitedstreaming in Action:
Photo Story 3 for Windows^{XP}

Photo Story for Windows is software that enables you to create a slide show with digital pictures. You can edit your pictures, add original music and narration and share your movies in class or on the school website.

Download a free copy of Photo Story 3 by going to http://www.microsoft.com/windowsxp/using/digitalphotography/photostory/default.mspx
Photo Story 3 runs on Windows XP Home Edition and Windows XP Professional.

In the Classroom

Students add new dimension to their writing projects as they write and record narration for digital movies. Using Photo Story's easy-to-use Record feature, students will put a voice to their story by telling it in their own words. Downloaded *unitedstreaming* images provide stunning visual imagery and exciting zoom effects allow students create drama and movement in their movie. By combining the audio, visual and narrative components of movie making, students will demonstrate their ability to select, organize and synthesize information by composing a story that effectively communicates an idea.

Create a Photo Story

Step 1   Have students select a topic.

Step 2   Have students map out the basic story and narration.

Step 3   Download topic-specific *unitedstreaming* images for students to use in their movies.

Step 4   Have students import images into the Photo Story filmstrip.

Step 5   Have students add a title to the story.

Step 6   Have students write and record narration and add background music.

Step 7   Preview the story and make edits.

Step 8   Show the movies in class or during a school assembly.

*Type notes to aid your memory as you narrate each picture.*

Click Preview to see how your story looks and sounds.

Drag a picture in the filmstrip to change the sequence.

Choose a specific music Genre and Style for your story.

Adjust the Tempo and Intensity of the music.

Click Play to hear what the music sounds like.
